Experiência Profissional

Back-end Developer with expertise in Java, Spring, Node.js, TypeScript, and Nest.js. Experienced in microservices, API integration, and CI/CD pipeline implementation. Proficient in MySQL database management and message queuing with RabbitMQ. Also familiar with Docker containerization and cloud programming with AWS.

Deltatec - Franca, São Paulo, Brazil

Junior Back-end Developer | 07/2024 – Present

- Developed and implemented crucial projects for the internal E-commerce system using Node.js, TypeScript, Nest.js, and MySQL within a lean team.
- Created robust and essential microservices for the team, including:
 - Internal proxy for frontend communication with other services
 - Mercado Livre integration for status inquiries, label generation, and metrics
 - Order webhook (RabbitMQ), reducing fulfillment time by 70% and eliminating manual queries
- Developed a full-stack employee management system using Java, Spring, Thymeleaf, and HTMX, hosted on Railway, with file storage, timesheet approval, and benefit inquiries, automating finance and HR tasks.
- Established separation between development and production environments, with release routines and testing, preventing unexpected errors and increasing software reliability.
- Documented all projects I worked on, maintaining clean code standards and applying SOLID principles.
- Alongside release routines, I implemented CI/CD pipelines replacing manual deployment processes and reducing update implementation time by over 400%.

Irroba – Franca, São Paulo, Brazil

Back-end Development Intern | 08/2023 – 06/2024

- Developed robust code using PHP and Laravel, impacting more than 2,000 e-commerce merchants.
- Implemented new features and resolved critical errors affecting thousands of users, utilizing agile methodologies.
- Implemented and configured AWS Lambda functions to automate backend processes, reducing the need for dedicated servers and optimizing scalability.

Educação
